## NOTICE OF ALLOWANCE

### I. ACTION SUMMARY

Claim 1 has been canceled. Claims 2-5 are pending.

### II. PRIORITY

Applicant's claim of priority to foreign application TAIWAN 92103728 filed on February 21, 2003 is acknowledged. However, the applicant has not filed an English translation as required by 35 U.S.C. § 119(b).

### III. RESPONSE TO AMENDMENT/REMARKS

**35 USC 103 Rejection:** Applicant's amendment, canceling claim 1, renders the rejection moot. Therefore, the rejection is withdrawn.

**Objection:** Objection to claim 2 for minor informality, namely, typographical error, has been withdrawn because the claim has been amended to correct this error.

### IV. REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The instant invention is an improved process for the manufacture of mycophenolate mofetil comprising a four step synthetic scheme that yield 99.9% purity and 89.5% yield in a reaction time of 24 hours. The process of making mycophenolate mofetil is accomplished by using (1) a transesterification reaction of the *ester derivative* of mycophenolate and 2-morpholinoethanol in the presence of a catalyst selected from the group consisting of alkaline metal salt, alkaline earth metal salt, tin

oxide and stannous oxide to produce the crude product. (2) Acidic aqueous solution is added to the crude material, which is then (3) basified and (4) the product is extracted from the basic solution. There is no prior art of record that anticipates or renders obvious the instant invention.

The closest prior art of record is Knox, et al., U.S. Patent No. 5,247,083 entitled "Direct Esterification of Mycophenolic Acid." Knox et al., teaches the method of synthesizing mycophenolate mofetil by refluxing for 8-200 hours mycophenolic acid (MPA) and 2-morpholinoethanol without the presence of a catalyst. The reference also teaches the same conditions with an acid or base catalyst. The prior art of reference does not teach the catalyst used in the instant invention, does not teach transesterification reaction and does not teach the four step method of the instant invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### CONCLUSION

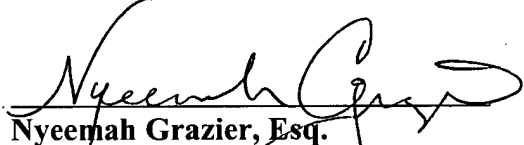

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nyeemah Grazier whose telephone number is (571) 272-8781. The examiner can normally be reached on Monday through Friday from 8:30 a.m. - 5:00 p.m..
